[SUBMIT ASSIGNMENT](#)**EXPERIENCE**

Evan Williams serves as Director of the East Region and as an Executive Building Consultant with RMC Group, bringing extensive expertise in complex insurance restoration and property damage assessment. Prior to joining RMC Group, Evan established his career foundation through several years in the insurance industry, where he excelled as a claims resolution specialist and claims team manager, developing comprehensive skills in reconciling complex weather-based losses.

Throughout his insurance career, Evan distinguished himself as a valuable estimating resource and peer-to-peer trainer across northern Texas, providing quality claim evaluations with thorough analysis of policies, procedures, and jurisdictional compliance requirements. He provided litigation assistance for over 300 property claims, preparing professional written communications for both plaintiff and defense counsel. Evan's leadership of the East Region involves coordinating complex projects, managing consultant teams, and ensuring accurate damage assessments across diverse property types while maintaining strict adherence to regulatory requirements and industry best practices.

RELEVANT EXPERIENCE

- RMC Group, Director of the East Region
2024 to Present
- RMC Group, Executive Building Consultant
2018 to Present
- Liberty Mutual Insurance, Property Claims Resolution Specialist
2017 to 2018
- State Farm Insurance, Auto Claims Team Manager
2016 to 2017
- State Farm Insurance, Property Field/Litigation Claims Specialist
2014 to 2016

FEATURED PROJECTS

- **Fire, Elementary School - 2023**
As project lead, Evan established a comprehensive scope of work, pricing structure, and period of restoration for a severely fire-damaged elementary school where over 50% of the building sustained catastrophic damage. Working in close collaboration with structural engineers, environmental hygienists, and local education authorities, he coordinated safety protocols and abatement procedures while ensuring compliance with educational facility regulations. His detailed damage assessment and accurate cost projections facilitated efficient claim resolution, with total repairs valued at \$8M, while restoration timelines aligned with the district's educational calendar requirements.
- **Tornado, City Waste Treatment Facility - 2023**
Evan provided comprehensive valuation, reconstruction consultation, and estimation services for water treatment and distribution systems severely damaged by a tornado. Since the project encompassed multiple critical infrastructure components including wastewater treatment facilities, raw water treatment systems, water towers, and pump stations, he worked as primary liaison between municipal authorities, engineering teams, and environmental specialists. Having conducted a thorough assessment of structural damage and system interruptions, Evan coordinated with contractors and equipment vendors to develop detailed cost projections and restoration timelines that minimized service disruptions while ensuring compliance with environmental regulations and municipal standards, with total project costs estimated at \$11M.

FEATURED PROJECTS CONTINUED

- Hurricane Ian, Retirement Community - 2022
Managing a team of consultants and oversight of CAT parameters, Evan coordinated comprehensive inspections and damage assessments across a 195-location mixed residential complex impacted by Hurricane Ian. The project scope encompassed diverse property types including hospital facilities, a golf course, restaurants, single-family dwellings, and low-, mid-, and high-rise apartment buildings, along with common areas and a central chiller system. Evan directed a systematic evaluation of wind-related damages, coordinating with structural engineers and mechanical systems specialists to assess building integrity, HVAC infrastructure, and property-wide utilities. Working closely with carriers, property management, and local authorities, he established mitigation protocols and developed accurate repair estimates that addressed both immediate safety concerns and long-term restoration requirements while significantly reducing business interruption for the retirement community's operations.
