

**ALAN DOYLE**

Executive Building Consultant

[SUBMIT ASSIGNMENT](#) a.doyle@rmcteam.com
newloss@rmcteam.com M (903) 512-4964
O (913) 601-4546 Houston, TX**EXPERIENCE**

Alan Doyle joined RMC Group in 2023 as an Executive Building Consultant, bringing over 25 years of experience in construction, restoration, and building-envelope consulting. He has led projects across residential, multi-family, hospitality, education, commercial, industrial, and retail sectors, including strip malls and restaurants.

Alan's leadership includes managing CAT teams during major hurricanes and tornadoes, as well as directing project teams, developing scopes, conducting site inspections, and analyzing repair reports. His commitment to clear communication with insurance carriers, stakeholders, and contractors underscores his strong work ethic.

- **Gemstar Construction, Estimator**
2003 to 2006
- **Trinity Restoration, Project Manager**
2000 to 2003

FEATURED PROJECTS

- **Hurricane Ian, Newport, FL - 2022**
Leading the response to Hurricane Ian, Alan coordinated daily inspection teams and maintained detailed progress reports for the client. To highlight efforts, including oversight of mitigation and abatement schedules and budgets, he systematically reviewed inspection photos and field notes, developed detailed scope and repair estimates for each site, and delivered a comprehensive loss analysis. His efforts resulted in a repair plan estimated at \$5M in total damages inspected with clear communication to carriers, syndicates, contractors, and the insured along the way encompassing NTEs as well as code and compliance upgrades.
- **Freeze, Texas - 2021**
During the freeze catastrophe in Texas, Alan lead 5+ consultants during site inspections and loss assessments for a chain of 18 hotels across Houston, San Antonio, and Austin. He culled 30+ teams of contractors, plumbers, and hygienists and analyzed all loss-related documentation which included repair invoices and photos. Alan kept clear communication with carriers, syndicates, and municipal services throughout the event to prepare detailed repair estimates and comprehensive loss analyses for each property with the project's total estimated value at \$2.8M.
- **Hurricane Ida, St. Johns Parish, LA- 2021**
As project lead for the response to Hurricane Ida, Alan directed a team of six consultants to assess damage to over 200 public and municipal buildings after a Category 4 hurricane. He established inspection protocols and prioritized infrastructure needs with input from emergency services and parish leadership which led to the detailed scope and repair estimate totaling \$5.2M. By coordinating with municipal authorities, engineers, hygienists, syndicates, and carriers, Alan ensured accurate documentation, regulatory compliance, and rapid claim resolution. This lead to minimizing service interruptions to essential services and addressing urgent public safety concerns directly from emergency protocols throughout the project's timeline.

FEATURED PROJECTS CONTINUED

- **Hurricane Maria, Puerto Rico - 2017**
Leading the recovery efforts in the aftermath, Alan managed a team of 14 consultants to inspect 300 commercial buildings and 30 multi-family properties after a Category 4 hurricane. He coordinated logistics across teams of contractors and subs, localized materials pricing, prioritized urgent restoration needs with local authorities, and developed comprehensive repair estimates totaling \$30M. Despite widespread infrastructure challenges, Alan maintained clear communication with insurance carriers, property owners, and emergency agencies, ensuring thorough assessments and timely claim resolutions that supported rapid community recovery.
